

As society reassesses its understanding of gender, young transgender persons are feeling more comfortable living their trans identity openly. Higher education institutions increasingly need to address the practical concerns of young trans students, often with little direction from the law, institutional policy, or governmental guidance. This article addresses the current status of the law on transgender issues in the context of higher education (specifically Title IX), and offers some practical solutions for colleges and universities in the key areas of records, housing, restroom and locker room access, and athletics.
